DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 12-18, drawn to a method of processing a semiconductor substrate in a plasma, classified in class 438, subclass 710.
 - II. Claims 1-11 and 19-31, drawn to apparatus for processing a semiconductor substrate, classified in class 118, subclass 723.
2. The inventions are distinct, each from the other because:

Inventions I and II are related as process of making and apparatus for making. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be made by another and materially different apparatus or (2) that the apparatus as claimed can be used by another and materially different process (MPEP § 806.05(f)). In the instant case the apparatus as claimed can be used with another and materially different process, for example, plasma processing of a semi-insulating substrate.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classifications, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2813

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
